

Blue River Information Technology rapidly gains Netapp Platinum Partner Level

Blue River Information Technology began operations in April of 2008 and by June of the same year had signed on with Netapp as a Federal Partner and Value Added Reseller. Shortly thereafter in October or four months later, Blue River IT was promoted to Platinum Level Partnership.

Blue River Information Technology was the most rapidly promoted partner in the history of Netapp, both Commercial and Federal Channels.

Blue River Information Technology continues to focus their growing energy and resources in developing new Netapp customer opportunities throughout the Federal Civilian Agencies and Department of Defense.

Netapp remains Blue River Information Technology's chosen standard for Backup / DR / COOP and other critical storage requirements within their enterprise solutions offering.
